B.A. Computer Science & Philosophy

Aug. 2024 – May 2028

Charlottesville, VA

- GPA: 3.65/4.0
- Family Head and Member of Organization of Young Filipino Americans at UVA
- Clarinet Drill Leader and Member of Cavalier Marching Band and Athletic Band
- Previous Sergeant at Arms and Current Member of Alpha Phi Omega Service Fraternity

WORK EXPERIENCE

Deli Production Expert

Target

May 2026 – Present

Manassas, VA

- Followed strict food safety protocols and multi-step production procedures, maintaining accuracy in bi-hourly temperature logging and inventory tracking
- Adjusted daily production based on sales patterns to reduce waste and maintain product availability during high-volume shifts

Lifeguard II

Prince William County Government

May 2023 – Aug. 2025

Manassas, VA

- Managed team of lifeguard staff of over 80 people as one of their direct supervisors
- Provided first-aid assistance for patrons at waterpark with a capacity of 1000+ patrons
- Maintained proper chemical levels for multiple pools hourly

PROJECTS

UVA Pickleball | *Python, Django, PostgreSQL, AWS S3, Django Channels*

Jan. 2026 - May 2026

- * Served as QA lead of a team of five and helped develop a club management platform built for the UVA Pickleball club that supports real-time chat, announcements, event scheduling, document storage, and role-based access control
- * Implemented user authentication and role-based access control using Django-allauth and Google OAuth, enabling secure login for 3 distinct user roles

Yumpie | *Python, Django, Gemini API, SQLite3, Auth0*

Mar. 2026

- * Helped develop a full-stack web application that scans pictures of fridges, identifying foods and their expiration dates, and generates custom recipes in under 24 hours with a team of four at Hoohacks Hackathon
- * Implemented Google Login with a Django backend using Auth0
- * Helped implement Gemini API to scan images, identify certain foods in images, and curate custom recipes based on specific ingredients

Neuralingo | *Python, Flask, Gemini API*

Mar. 2025

- * Co-developed an AI-powered chatbot enabling users to practice conversational foreign language skills in under 24 hours at Hoohacks Hackathon
- * *Integrated Gemini API with a Flask backend to generate dynamic conversation responses in real time*
